CUMULATIVE INDEX 1982

To help locate pertinent subjects, authors, articles, and book reviews, we have published three separate indexes for 1982.

Cumulative Subject Index lists subject terms for all articles contained in the 1982 *American Demographics*. An asterisk (*) after the date indicates a book review.

Author-Title Index lists all authors & the titles of their articles.

Index of Books Reviewed lists all books reviewed during the year.

All references are by month and page number; thus, "Ja/33" refers to the January issue, p. 33.

Demographic Demand Area Contour maps match your customer profile to the population block group demographics, targeting your best sites.

With the aid of computer graphics you can now identify who your customers are, where they are, and select additional sites all in one step. Age, income, population density and growth, mobility, number of households, profession, education, and ethnicity are particularly important for commercial site locations. Physical and economic barriers, cultural boundaries, zoning, distance-decay, employment centers and locations of competitors are necessary locational determinants.
